As we all know, the first step into gun prohibition is registration. Registration is designed to provide the government with a list of gun owners, so that they can proceed into the second step, which leads to gun licensing.

Instead of banning all guns outright, the government will call for you to register and license your personal firearms; thereby, converting your right into a government granted privilege. If they succeed in that, it will make it easier to confiscate firearms.

If a gun license is not granted to you, later the government will demand that you turn in your guns during a special amnesty period. When the amnesty period expires, the government will forcibly begin to confiscate your firearms!

If this happens, you will lose much more than just a “hobby!” You will lose your freedom, your safety, your property and possibly your life!

Here is what has happened to the many foolish citizens who once put all of their trust in their own government throughout the world:

In 1911, Turkey imposed gun prohibitions and only four years later in 1915 the Turkish government killed one-and-a-half million disarmed Armenians!

In 1935, the Soviet Union and the People’s Republic of China banned firearms, and only a few years later (1948 to 1952), fifty million dissidents in both communist countries were murdered!

The formula is quite apparent:
First, comes Registration.
Second, comes Licensing or Prohibition.
Third, comes Confiscation.
Fourth, comes Genocide!

The Communist Genocide was the biggest holocaust! In Germany, history repeated itself again. They exterminated six million unarmed Jews and many other disarmed people, including Gypsies, “mixed bloods” and other so-called ‘undesirables,’ as well as many Christian friends (who tried to save them) increasing that number to as high as 13 million!

In 1956, Cambodia established gun control, and again, only a few years later (from 1975 to 1977) the Cambodian government murdered a million of its own citizens!

In 1964, Guatemala began gun control. In that very same year they began killing unarmed Mayan Indians in which more than 100,000 died by 1981.

In 1970, Uganda murdered 300,000 Indians and Christians from 1971 to 1979, beginning only one year after prohibiting personal firearms.

Statistics have already proven that the safest place to live is where there are very few restrictions on firearms and where most people are allowed to carry guns.

At the present time, the United States gun prohibitionists would like to give you one of these 3 choices:

1) the Hospital,
2) the Cemetery, or
3) Prison!

Remember! Our nation’s founding fathers warned us that: “Those who do not learn from the lessons of history are doomed to repeat it!”
